DETAILED ACTION

Allowable Subject Matter

1. Claims 2-6, 8-13, and 15-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art fails to teach or fairly suggest the overall combination including a pulse width modulation circuitry including a pulse width modulation encoder for generating a pulse width modulated stream and another parallel pulse width modulation encoder for generating another pulse width modulated stream; and a mismatch shaper for selectively distributing variations in duty cycle between the duty cycle modulated stream and the another duty cycle modulated stream for odd values of the input stream; and a conversion circuitry for converting the duty cycle modulated stream and the another duty cycle modulated stream into an analog signal, wherein the conversion circuitry including a finite impulse response filter for converting the duty cycle modulated stream into a plurality of filtered data streams; and another finite impulse response filter for converting the another duty cycle modulated stream into another plurality of filtered data streams. Therefore, claims 2-6, 8-13, and 15-26 are presently allowed.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on
